PROJECTS & SKILLS

CityBus - A Web Application for Managing Bus Timetables and Bookings

Designed and developed a web-based system to manage bus schedules, routes, and seat bookings efficiently for both administrators and passengers.

Features include route and schedule management, booking interface for passengers, seat availability checks, and admin dashboard for managing operations.

Technologies Used: HTML, CSS, PHP, MySQL

GitHub Repository: <https://github.com/Dilmith-Ranasinghe518/CityBus.git>

VideoHUB - A Web-Based Platform for Sharing and Monetizing Video Content

Developed a web application that enables content creators to upload, showcase, and monetize their video content seamlessly.

Features include video uploading, streaming, categorization, likes/comments, and monetization options for creators.

Technologies Used: Java , MySQL, Thymeleaf, HTML/CSS, JavaScript

GitHub Repository: <https://github.com/Kamindumenula/VideoHub-JavaProject>

LuxeHaven – Full-Stack Real Estate Web Application

Developed a full-stack web application that allows users to browse, manage, and publish property listings with role-based access for admins, sellers, and buyers.

Features include secure user authentication, role-based dashboards, and full CRUD operations for property listings, enabling sellers to manage their own properties while buyers can view available listings.

Technologies Used: Next.js, Node.js, Express.js, Neon PostgreSQL, JWT Authentication, Tailwind CSS

GitHub Repository: <https://github.com/Akalankagunathilake2002/luxe-haven>

MyTask – Dockerized Microservices Application

Developed a Dockerized microservices-based backend application to manage users, tasks, and notifications using an event-driven architecture.

Features include user and task management, asynchronous communication using RabbitMQ, service separation, and containerized deployment using Docker and Docker Compose.

Technologies Used: Node.js, Express.js, MongoDB, Mongoose, RabbitMQ, Docker, Docker Compose, REST APIs

GitHub Repository: <https://github.com/Akalkagunathilake2002/Dockerization>

Learnify AI – Online Learning Platform with AI Tutor & Subscription Model

Learnify AI is a full-stack online learning platform designed to deliver structured courses with role-based access control, AI-powered learning assistance, and a subscription-based premium model.

Technologies Used: FastAPI, PostgreSQL, SQLAlchemy & Alembic, Stripe, Groq AI, JWT Authentication, Docker, Svelte

GitHub Repository: <https://github.com/Akalkagunathilake2002/Learnify-AI>

SKILLS

Java, JavaScript, TypeScript, Python, and SQL with full-stack development experience using React, Next.js, React Native, Spring Boot, Node.js, Vercel and Express. Strong in RESTful APIs, JWT authentication, MVC architecture, MongoDB, PostgreSQL, MySQL, Docker, RabbitMQ, Git, and modern development practices

SOFT SKILLS

Problem solving, Adaptability, Good communication, Content creation, Leadership

EDUCATION

Sri Lanka Institute of Information Technology | Malabe | Sri Lanka

Software Engineering (2023 May – present) | Graduation year – 2027 | Current GPA: 3.40

G.C.E Advanced Level – Commerce stream 2021(2022) – Successfully completed with 2A s and one B (Index no:(5167965)

Professional qualification – AAT Passed Finalist (Student No: 3316054)
