🌐 VgcMalhara

Professional Summary

Enthusiastic and adaptable final-year IT student pursuing the National Diploma in Technology (NDT), with strong skills in software engineering and web development, and a growing interest in DevOps practices. Passionate about designing and developing scalable, secure, and efficient web solutions. Eager to apply technical knowledge to real-world challenges, collaborate within dynamic teams, and continuously learn emerging technologies to drive innovation and improve system performance.

Technical Skills

Languages: Java, Python, JavaScript, HTML5, CSS3, PHP

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Laravel, Express.js

Databases: MySQL, MongoDB

DevOps & Tools: Git, GitHub, VS Code, Apache NetBeans

Core Skills: Problem Solving, Agile Development, Team Collaboration

Key Projects

Cloud-Based Parking Reservation System

JustPark.lk

2024–Present

- Developing a comprehensive parking management platform with real-time availability tracking
- Implementing location-based search functionality for optimal user experience
- Mentored by Dr. K. Galappaththi, demonstrating strong academic-industry alignment
- **Technologies:** React.js, Node.js, MySQL

Farm-to-Consumer E-Commerce Platform

HelaHarvest.lk

Ongoing

- Architecting a direct-to-consumer platform connecting farmers with buyers
- Real-time updates of available crops and stock
- Reducing supply chain complexity through digital marketplace solutions
- **Technologies:** React.js, Node.js, MongoDB

Automatic Number Plate Recognition (ANPR)

Real-Time Vehicle Number Plate Recognition System

2025

- Developed a real-time ANPR system with dual modes: image upload and live webcam detection
- Implemented YOLO-based object detection to identify vehicle number plates from images and live video streams
- Integrated Tesseract OCR to accurately extract text from detected number plates
- Built automatic mode handling: webcam activates instantly and safely closes when switching modes
- Saved detected plate images and logged plate numbers with timestamps for record-keeping
- Displayed detected plate images and numbers on a user-friendly Flask-based web interface
- **Technologies:** Python, OpenCV, YOLO, PyTorch, TensorFlow, Tesseract OCR, Flask, HTML/CSS, JavaScript

Education

Institute of Technology

National Diploma in Technology (NDT)

University of Moratuwa

Present

- **Specialization:** Information Technology
- Comprehensive curriculum covering software engineering, web development, and system design
- Active participation in project-based learning and collaborative development

St. Thomas College

G.C.E. Advanced Level

Matara

2019–2021

- **Stream:** Physical Science
- **Results:** 2B, 1C | **Z-Score:** 1.26
- Strong foundation in analytical thinking and problem-solving

Certifications & Professional Development

2024: Python for Beginners – Completed comprehensive programming fundamentals and practical problem-solving exercises

Additional Strengths

- Strong communication and presentation skills demonstrated through project deliverables
- Proven ability to learn and adapt to new technologies quickly
- Experience working in team environments and collaborative development
- Attention to detail in code quality, documentation, and project management
- Passionate about staying current with industry trends and best practices
