TECHNICAL SKILLS

Programming languages

- PHP
- JAVA
- JavaScript
- C/C++

Web Development

- ReactJS
- Spring Boot
- CSS
- HTML
- ExpressJS
- SQL
- Material UI
- Bootstrap
- .NET
- NodeJS

Database

- MySQL
- MongoDB

Others

- Docker
- Postman
- GitHub

Tools

- Figma
- Adobe Xd
- Power BI
- JIRA

ABOUT ME

Dynamic Software Engineering undergraduate with a robust foundation in software development, cybersecurity, and UI/UX design. Proficient in backend and frontend technologies, with hands-on experience in building scalable, secure web applications using PHP, SQL, and APIs. Adept at problem-solving, project coordination, and effective communication, I thrive in collaborative environments. Passionate about leveraging innovative solutions to drive organizational success and align with cutting-edge industry goals.

EXPERIENCE

Associate Software Engineer

2025 Aug – Present

Etronic Solutions
United Kingdom – Remotely

Trainee Software Engineer

2025 Jan – 2025 July

Etronic Solutions
United Kingdom – Remotely

During my internship at Etronic Solution, I developed PHP and SQL-based web applications, optimized databases, implemented payment gateway integrations, integrated APIs, and incorporated an OTP server for enhanced security. Mentored by Mr. Amila Shanaka, I strengthened my skills in secure coding and dynamic web development while working remotely. I improved my problem-solving, time management, and teamwork abilities through code reviews and virtual collaboration, preparing me for a career in software engineering.

EDUCATION

BSc. (hons) in Software Engineering

2022 – Present

University of Kelaniya, Sri Lanka.
Current GPA – 3.2 /4.0

Specializing Domains:

- Data Science and Engineering Application
- Net-Centric Application
- Business Engineering Application

G.C.E Advance Level – Physical Science

2020

Rahula College, Matara.
Z Score – 1.6784

INTERESTS

- UI/UX Designing
- Photography & Videography
- Cybersecurity

SOFT SKILLS

- Critical Thinking
- Teamwork
- Communication Skills
- Project Management
- Time Management
- Quick Learning

PROJECTS

Real Time Chat App (Individual)

2024 April - 2024 June

Developed a real-time chat application that effectively manages user connections, message broadcasting, and room management. This project provided crucial experience in implementing state management, event-driven programming, and RESTful API design, resulting in a robust software solution for seamless communication.

GitHub Repo

Tech: React | Express.js | MongoDB | Node.js | Socket.IO | Docker

Emoto Bristol (Internship)

2025 March - 2025 April

Developed a full website for Emoto Bristol Ltd, a customer-focused e-scooter company promoting sustainable urban mobility. The system includes an Admin Panel for managing products, blogs, company details, and a new inquiry management feature that streamlines customer communication. The client-facing site showcases Emoto's e-scooters, accessories, and community events through a modern, eco-conscious design. This project enhanced my full-stack skills, particularly in real-time communication and e-commerce user interaction.

Live Site

Tech: PHP | Bootstrap | MySQL

Dantech (Internship)

2025 May - 2025 June

Developed a website for a computer repair shop offering reliable and affordable IT services. It features an Admin Panel for managing services, company information, and customer inquiries, and a client-facing site with details on services, contact options, and business hours. A key feature is the Google Reviews integration, which displays real-time customer feedback to build trust. This project strengthened my skills in API integration, dynamic content management, and creating customer-focused functionality for service-based businesses.

Live Site

Tech: PHP | Bootstrap | MySQL

Sky Inside (Internship)

2025 July

Developed a website for Sky Inside, a company enhancing indoor environments with digital solutions. It features an Admin Panel with a content management system for products, blogs, and settings. The client-facing site highlights Feature Windows and Living Skies™, simulating natural scenes to boost mood and aid recovery. The system emphasizes usability, scalability, and performance.

Live Site

Tech: PHP | Bootstrap | MySQL

Online Clothing Store (Individual)

2024 June - Present

Developed an online clothing store featuring robust user authentication through Spring Security, ensuring a secure shopping experience for users. This project encompassed the entire software development lifecycle, resulting in a full-featured e-commerce platform. Key considerations included scalability to accommodate growing user demand, security to protect sensitive data, and performance optimization to ensure fast loading times. The project successfully delivered a seamless user experience, fostering customer engagement and satisfaction.

GitHub Repo

Tech: React | Spring Boot | Spring Security | MySQL | Tailwind CSS

MoMo (Group)

2023 July - 2024 June

Developed a web application for online cool gadgets ordering, enabling users to browse menus, place orders, and authenticate their accounts for secure transactions. The project enhances the customer experience by providing a responsive and user-friendly interface. It follows a structured approach to separate concerns, promoting maintainability and scalability, which are essential for future enhancements.
