PROFILE SUMMARY

I'm a motivated Software Engineering student at the Institute of Software Engineering (IJSE), currently pursuing a HND in Computer Science. I specialize in full stack development, with hands on experience in Java, Spring Boot, Hibernate, React, React Native, Node.js, and Express.js. I'm passionate about learning modern technologies, collaborating in teams, and creating innovative solutions that make a real world impact.

PROJECTS

Point of Sale (POS) System(Find Places And Furniture)

- Built with Spring Boot (backend) and HTML (frontend), packaged using MVC.
- Features product management, billing, sales and customer management.
- Implemented RESTful APIs, secure authentication, and a responsive desktop UI.

Bus Ticketing booking System(QuickBus)

- Built a full-stack web platform for bus ticket booking and passenger management.
- Developed using Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript, and jQuery.
- Integrated PayHere (test mode) for secure and seamless ticket payments. Implemented role-based access control for passengers and admins to manage bookings, schedules, and system permissions effectively. Designed an interactive and user-friendly interface to enhance the bus booking experience, allowing users to easily search routes, select seats, and confirm payments

Personal Note Management(Mobile app)

- Note app is a mobile application built with Expo and React Native that allows users to easily write and manage note.
- The app is designed for anyone who needs to write the note on the go.
- Edit & Delete Notes: Manage your notes with full CRUD operations.

Smart Parking Management System – Backend

- Developed a microservice based backend system using Spring Boot for smart vehicle parking operations.
- Implemented services for user management, vehicle tracking, parking slot allocation, and payment handling.
- Used JWT based authentication and Spring Security for secure access control.
- Built RESTful APIs to ensure scalable and efficient communication between microservices.
- Focused on modular architecture to improve maintainability and system performance.

Personal Portfolio Website

- Developed a responsive portfolio using React, Vite, TailwindCSS, and Framer Motion.
- Showcased projects, skills, and background in a clean and modern interface.
- Implemented smooth animations and transitions for an engaging user experience.

SKILLS

Backend Frameworks: Spring Boot, Hibernate, Node.js, Express.js, RESTful API Development

Frontend Frameworks: React, React Native, Bootstrap, jQuery

Languages: Java, Python, TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

UI/Styling: TailwindCSS, Shadcn/ui, Bootstrap, Responsive Web Design, Framer Motion

Database Management: MySQL, MongoDB, Hibernate ORM

Build & Tools: Maven, Vite, npm, Postman, IntelliJ IDEA, WebStorm, VS Code

Version Control: Git, GitHub

Testing & Debugging: Postman API Testing, Console Debugging, Error Handling in IDEs

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

EDUCATION

IJSE-Institute of Software Engineering Panadura Graduate Diploma in Software Engineering

2023(Aug) - Present

Currently following the HND program in Computer Science, covering:

- Object Oriented Programming (OOP) with Java
- Backend development using Spring Boot and Hibernate
- Frontend technologies: HTML, CSS, JavaScript, and React
- Database management with MySQL
- Software engineering principles, data structures, and algorithms
- Version control using Git and GitHub
- Building full stack web applications

Wadduwa Central Collage

Completed secondary education with strong academic results:

- G.C.E. O/L: 4As and 3Bs and 2Cs
- G.C.E. A/L (Maths Stream):

ICT - C

Combined Maths - S

Physics - S

2013 - 2022
