PROFILE

I am an ICT (Honors) undergraduate at Rajarata University of Sri Lanka, having completed my academic coursework, with hands-on experience in full-stack web development using HTML, CSS, JavaScript, and modern frameworks. I focus on building clean, maintainable, and high-performance solutions while following best software development practices. I am a strong problem solver who works well in collaborative environments and am seeking a Full-Stack Developer role to contribute to real-world projects while further developing my expertise.

PROFESSIONAL EXPERIENCE

Software Engineering Intern, eSupport Technologies (Pvt) Ltd May 2025 - Nov 2025

- Developed and maintained 5+ full-stack web applications using React.js and Laravel.
- Built responsive and user-friendly UI interfaces using Material-UI and Tailwind CSS.
- Executed backend logic, integrated RESTful APIs, and managed MySQL databases.
- Collaborated with cross-functional teams, applying strong time management, problem-solving, and communication skills to deliver features within project timelines.

RESEARCH

Machine learning based approach for rice leaf diseases prediction using weather and Soil quality based on the Anuradhapura area. Feb - Nov 2025

Rajarata University of Sri Lanka
This research applies LSTM-based machine learning models to predict rice leaf disease risk using historical weather and soil data. The study supports early disease detection and data-driven decision-making for sustainable rice cultivation in Sri Lanka.

PROJECTS

Doctor Appointment Booking System  Sep- Oct 2025
Developed a full-stack MERN web application enabling role-based access for patients, doctors, and administrators. allowing secure booking, profile management, and appointment control.
